- Ensure product integrity, freshness, and sanitation supporting cost management through waste reduction
- User-friendly design tailored for both FOH and BOH
- Utilizes standard 1.5 or 3-gallon Condiment BIB volume packaging
- Compact footprint to streamline countertop space while enhancing aesthetics
- Clean-In-Place without dismantling (optional Sanitizing System available)

In Development:

Portion and Viscosity Controlled Dispense

Condiment Dispensers

What are the Needs for Current Locations, Remodels, NSOs, and Future?

- Front of House
- Back of House
- Aesthetics
- Counterspace
- Less Waste
- Eco-Friendly

- Customers control self-serve product
- Line Prep, To Go Containers, and/ or Portion Control
- Easy-to-Clean countertop without clutter
- Small footprint for optimum countertop usage
- Reduction in number of packets being given away without being used
- The manufacturing process of plastic packets produce greenhouse gas and final product is non-biodegradable

Reduce individual condiment packet waste:
3 gal vol pack = 1,160 .3oz packets

Future of Condiment Side Note:

CA Regulation conversation started getting more notice in 2022.
Europe is now considering a ban on individual packets by 2030.

Wunder-Bar - JoeTap Quad

- 4 product dispense tower - countertop mounted
- Dispense still and nitro: coffees, teas, lemonades with push button technology
- Up to 4 products in 2 formats = 8 beverage options
- Precise infusion controls for each faucet

Wunder-Bar – JoeTap NITCOM Lite

- 1 product tapped to dispense still and nitro beverage
- Fridge can hold 2 beverage tanks – 1 on-line, 1 backup
- Precise nitro infusion control
- Undercounter space saving design

U-Line – 15" & 24" wide units

- Beverage tanks - holds: 2.5gal, 3gal, or 5gal tanks
- 2, 3, or 4 faucet dispense
- Nitro and still configurations available
- Zero clearance front breathing units

Wunder-Bar™

Automatic Bar Controls Inc.

JoeTap®

Infusing beverages with nitrogen gas has expanded from cold brew coffee into the full beverage category.

Customers are nitrogenating: Flavored Tea, Lemonade, Black Tea, Flavored Lemonade, Juice Drinks, Sweet Tea and more.

Include nitro brew to a cocktail menu or other flavor options to "smooth up" a mocktail menu!

Bonus: Pour the nitro beverage over ice cream and now you have an incredibly smooth variation of an affogato or ice cream float...

JoeTap Countertop Nitro – In Development

The ultimate solution for a sleek, adaptable, and efficient nitro countertop beverage dispensing experience!

- 4 Versatile Dispense Portions:
 - 3 field programmable portion controlled + 1 free flow
- Doubles Product Offerings: 2 BIBs = 4 Options
 - Nitro & Still dispense from each faucet
- Flowrate of 1-1.5oz per second and Rapid Recovery between pours
- Digital Ratio Control to Customize from 3:1 to 15:1 ratio products
- Semi-Automated Programmed One-Touch Cleaning Procedure
- Optional Integrated Gas Module and External Gas Source Port Available
- Light Weight and Compact Footprint
- Industry Standard 1-Gallon BIBs

Beverage Tanks (Corny Kegs) are stainless steel, upright, cylindrical tanks with rubber gaskets constructed to hold pressurized liquid.

Bag-In-Box (BIB) beverage concentrate is becoming a popular request in the market.
